Seated Neck and Shoulder Massage

Course Code: GCPD-45970-2018-1-NL

There may be certain situations where lying on the couch for a massage is not a possibility for your client. A seated Neck and Shoulder massage is a great treatment to offer your clients who are too frail to lie down on your couch or they may not be comfortable lying face down. This treatment is also suitable for pregnant ladies who would also find lying down uncomfortable. This routine also offers an additional treatment approach to the standard body massage. Safety advice and specific contra-indications will be discussed before a demonstration of the treatment; this will be followed by guided student practice on each other. A handout and written routine will be provided.
