

ORANGE BIKE MIND WORKSHOP - RIDING THE BIKE OF YOUR MIND IN THE AGE OF INNOVATION

SG-47577-2018-1-F

- **Achieve lifelong upgrade in your leadership abilities**
- **Workshop developed over five years by a Harvard-Educated Professor**
- **Match the life-style of the innovation age (and especially Hong Kong)**

INTRODUCTION

This 4.5 hour packed workshop is designed to “install” mindfulness – a quality practiced by leading firms like Google, McKinsey, General Mills and Aetna. Mindfulness is a well-researched domain, with thousands of years of tradition. The workshop is designed as a “wise intervention” to teach you how to ride a special kind of a bike – the bike of the mind. In this bike:

- the front wheel tells you where to go (= openness)
- the back wheel propels you (= focus)
- the person who sits in the middle masters both (= control)

OBJECTIVES

In this workshop, Professor Yesha Sivan will explain, share, and then train you to be more effective in your cognitive abilities, in three states typical to the age of innovation:

- managing day to day tasks
- dealing with stress
- harnessing new opportunities

WHO SHOULD ATTEND

- Senior level leaders who want to enhance their personal abilities — specifically managers, innovators, entrepreneurs, and intrapreneurs

ADMINISTRATIVE DETAILS

DATE AND TIME

Thursday, 25 January 2018
8:30 am – 1:00 pm

FEE (inclusive of tea/coffee breaks)

HKMA Member: HK\$2,380

WORKSHOP STRUCTURE

CONTENTS

- Background – the innovation age, wise intervention, and the bike model
- Three basic “riding” techniques
- Three advanced “riding” techniques
- Reflect on the results, practice, and what to expect

WHAT PREVIOUS WORKSHOP PARTICIPANTS SAID

- Bike metaphor simple. Good to bring to the community. People only tend to remember 3 things a time (“open, focus, control”).
- Good packaging and attention to details. A good summary of basic techniques. How to relate tools to the bike.
- About balancing openness and focus. Started with mind and branch outwards. Relaxing. Change the way of thinking. Helps to bring back “me” time. Reminds to stay positive. Reminds about “self-caring”. Listening part very good. Remind to listen more and to focus on people’s reaction.
- Make me aware that meditation can be open and not just focus. Tools can be used in HK to help people to get focus and can do them daily.
- Bike concept very structured.
- Got me to think that you can do it in your daily life. Not easy in a group situation but workshop provide a safe place to do meditations together. Feel comfortable. Need to seek out opportunities.
- New experience. Help to think in new ways.

WORKSHOP LEADER

Professor Yesha Sivan is the founder and CEO of i8 ventures - a business platform focusing on "innovating innovating". He is also a visiting professor of innovation and venture at the Chinese University of Hong Kong Business School. Sivan's professional experience includes developing and deploying innovative solutions for corporate, hi-tech, government, and defense environments. He focuses on digital strategy (SVIT – Strategic Value of Innovation Technology), innovation and venture (employment black holes), mindful leadership (orange bike workshop), virtual worlds (3D3C platforms), and knowledge age standards. After receiving his doctorate from Harvard University, he has taught EMBA, MBA, executives, engineering and design courses in his areas of expertise.

COMMON QUESTIONS

1. Why Orange Bike?
It is an easy-to-remember metaphor. We will share why we chose the orange color, in the workshop.
2. What is “wise intervention”?
It is a relatively short experience that can have a lasting impact on individuals and groups (see the Stanford paper that describes wise intervention).
3. Does this relate to being Mindful?
Yes, we are looking for effective ways to “install” mindfulness which is a well-researched domain, with thousands of years of tradition, and that is being practiced by leading firms like Google, McKinsey, General Mills, Aetna, and others (see Harvard Business Review Article).
