5. Project Management Professional (PMP®)
Certification Test Preparation Course
3-day Course

Project Management Series

1

Agile Project Management (1 Day)

Introduction

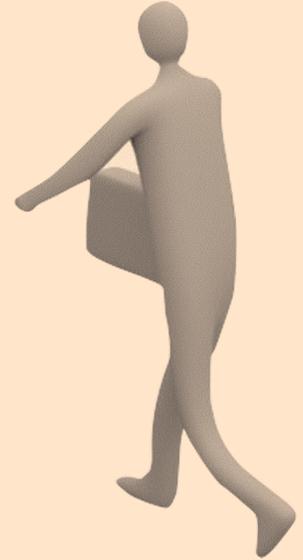

Statistics say that by using agile project management, on average, the time to market is 37% faster and the efficiency of your team is increased with a productivity higher by 16% than the average. In today's business world, time to market is so critical that it causes project management practices to change at the same time.

Benefits

Project managers would gain valuable insights towards a new Agile approach to projects vs. a traditional approach through an interactive workshop. Project managers could use a new approach to challenge themselves for delivering faster results.

Course Outline

- Traditional Approach to Project Management
- What is Agile PM?
- Agile Roles, Team and Environment
- Scrum and Sprint Overview
- Effective Agile Project Management

2

Tools & Techniques for Project Management (2 Days)

Objective

These project management series are "state of the art" courses for Project Management training in the world today. Developed by Global Business Management Consultants (GBMC), a Globally Registered **Project Management Institute (PMI®) Provider**, the aim of the course is to develop a complete set of management skills for your current level of project-related responsibility in your organisation.

Course Benefits

These project management series consist of several programmes. You can attend one programme at a time.

In Tools & Techniques for Project Management, You will learn to:

- Plan effectively and coach others to plan
- Set realistic Goals and Objectives
- Organise and Structure projects correctly
- Develop Schedules and Realistic Resource Plans
- Control Single or Multiple projects and tasks

Course Outline

- **Project Management Method – Tools & Techniques**
- **Participation**
- **Effective Project Planning**
- **Workshop: Structuring and Organising a Project**
- **Developing Realistic Schedules**
- **Workshop: Scheduling the Project, Developing a Resource Plan and Making Trade-offs**
- **Organising with Project Teams**
- **Project Control Techniques**
- **Project Risk Management**

3 Project Leadership for Success (2 Days)

Course Content

- Project Management Method – The People Side
- The Project Leader/ Manager
- Creating and Building the Project Team
- Communication and Motivation
- Leadership Skills
- Interpersonal Skills
- Participation
- Workshop

Who Must Attend

The course is designed for project managers and leaders, product development managers, engineers, marketing/operations/R&D/human resources/construction managers, functional managers who deal with project managers, team members who manage tasks and sub-tasks.

In Project Leadership for Success, You will learn to:

- Build project teams
- Adjust your management style to the situation
- Motivate and Empower Team Members
- Develop effective communication across project teams
- Manage cross-functional and cross-cultural project teams

Improving Performance Through Project Management

4 Project Risk Management (2 Days)

Introduction

Projects are inherently risky ventures. If there is no risk, the activity may not be a project. In this course, participants will learn that risk is identified, assessed and minimised in the project planning exercise.

A project plan consists basically of six things, project objectives (requirements, SOW), a work breakdown, (WBS), a project organisation (OBS), a project schedule, project baseline (budget) and risk management.

Benefits to You

This is a specialty course dealing with identification, assessment, mitigation and contingency planning of risk in projects. It creates proactive behaviours in project managers to address risks early in the project life-cycle which greatly enhance the ultimate success of the project.

Course Content

The broad learning goals of Project Risk Management include:

- * Implement Effective Planning and Control
- * Create Interactive Project Teams
- * Plan, Identify and Manage Risk

Project Risk Management is a two-day course that includes a brief refresher of tools and techniques of modern project management, but its emphasis is on risk planning, risk identification, risk analysis, risk response planning, and risk monitoring and control.

Who Must Attend

This course is targeted at new and experienced project managers who need effective, but simple techniques for risk management in projects. It is intended for people who want a review of applied methods and techniques to handle risk in daily project work.

Project Management Professional (PMP®) Certification Test Preparation Course (PMBOK™ 6th Edition) (3 Days)

This PMP® Certification Test Preparation course prepares the participant to sit and pass the prestigious Project Management Professional (PMP®) examination. This course is in complete compliance with the latest Project Management Institute (PMI®) guidebook, the "Project Management Body of Knowledge PMBOK™ Sixth Edition", which became the standard examination reference in mid-2009.

As Registered Educational Providers (REP) with the PMI®, the course leaders (Business Management Consultants) are authorised to grant 24 Professional Development Units (PDUs) towards the total of 35 required to qualify and sit the examination.

Who Must Attend

Project managers and team leaders who are preparing for the PMP® certification examination. Other project personnel and functional managers who work with projects will benefit from a better understanding of how their functional responsibilities fit into the total project management task.

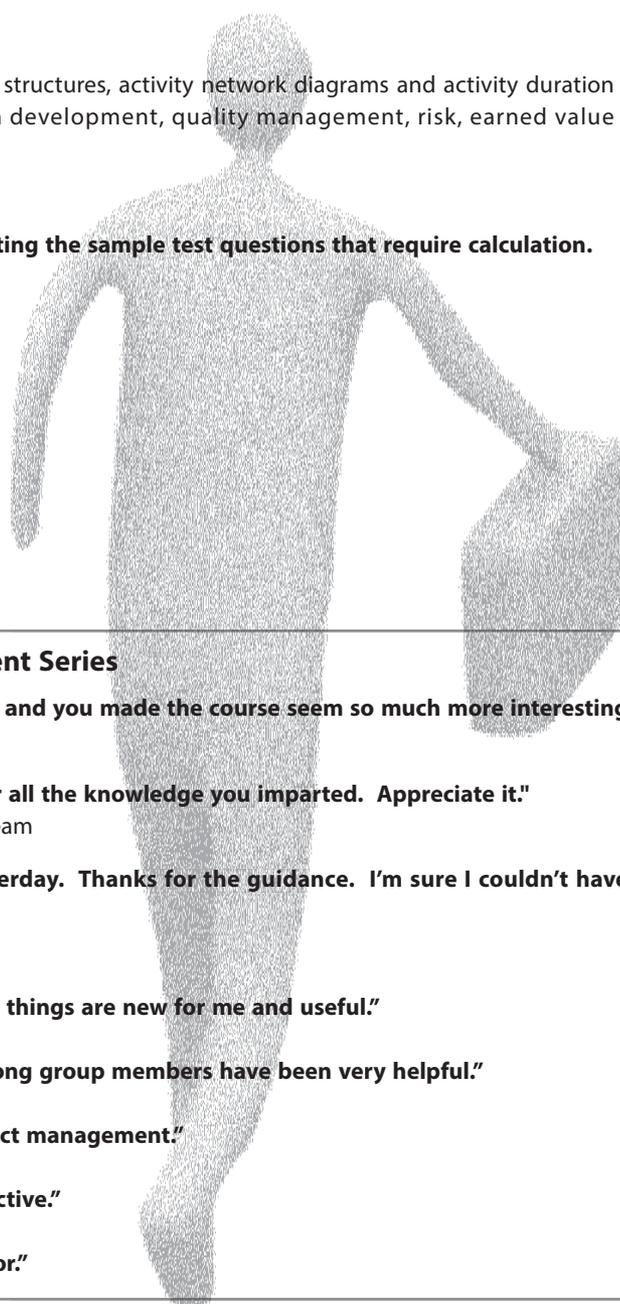

Prerequisites

You must be familiar with the basic elements of work breakdown structures, activity network diagrams and activity duration estimating, cost estimating, contracting, leadership and team development, quality management, risk, earned value management and organisational structures for projects.

PMP® Course participants must bring along a basic 5-function calculator to the workshop to assist them in attempting the sample test questions that require calculation.

Course Outline

- The Project Management Framework, Context and Processes
- Initiating Process Group
- Planning Process Group
- Executing Process Group
- Monitoring and Controlling Process Group
- Closing Process Group
- Professional Responsibility
- Preparing for the PMP Test

Past Participants' Comments on Project Management Series

"Learned a lot (especially your experiences) during the course and you made the course seem so much more interesting compared to just plain reading the PMBOK!"

I just cleared the exam today and want to thank you again for all the knowledge you imparted. Appreciate it!"

Patrick Lim - Project Manager, SAP Competency Centre, ES O&S Team

"Just keep you informed that I've passed my PMP exam yesterday. Thanks for the guidance. I'm sure I couldn't have made it on my own."

Seow Whee Low, Forecasting & Planning Manager

"There is a good balance between lecture and exercise. Many things are new for me and useful."

"It is an eye-opening workshop. Feedback and discussion among group members have been very helpful."

"The workshop has introduced many methodologies for project management."

"Case Studies are easy to understand and activities are interactive."

"It is useful with real world experience shared by the instructor."

Workshop Leaders

All programmes will be conducted by the following leaders or other Global Business Management Consultants (GBMC) Consultants. GBMC is a recognised provider registered with the P.M.I.® Registered Educational Provider Programme.
