

Workshop on Cyber Security Management

Thursday & Friday
15 & 16 June 2017
9:00 am – 5:00 pm

Supporting Organization:

CYBER SECURITY MANAGEMENT

INTRODUCTION

This course provides business managers and key decision makers a basic understanding of IT Security from both technological and managerial perspectives in this rapidly growing and changing field. IT Security aligns business process, strategy and enterprise infrastructure to maximize the return of investment and to grow a company's web presence while protecting the organization from the growing number of cyber threats from those who intend to do harm. The course introduces the fundamental and advanced concepts of IT Security and the best practices in planning, developing, implementing, and managing IT Security policies.

OBJECTIVES

Upon completion of the programme, participants will be able to:

- Understand the fundamental concept of IT Security
- Recognize the business needs and process in IT Security Management and to apply the best strategy for the implementation of IT Security policy
- Know how to protect and secure enterprise information, meet compliance requirements, including privacy regulations, and make it accessible for business analysis at the right time
- Understand ways to minimize the risks of doing business on the Web
- Develop a well-designed IT Security business plan to meet today's rapidly changing technological environment
- Demonstrate the ability to design and implement security features for enterprise infrastructure
- Describe the issues of digital crime and digital terrorism
- Identify ways in the investigation of security breaches and digital forensics

DESIGNED FOR

This course is designed for those who want to learn about the fundamental knowledge of IT Security and the business management of it. Although this course is NOT a technical program, basic technical concepts of IT security will be introduced. No prior IT security knowledge or experience is required. Most ideal candidates would be:

- Business/Enterprise architect
- IT project manager
- IT policy/decision makers
- Business analyst
- Finance executive managers
- Marketing Directors
- People who would like to explore this growing area or to consider a career in IT security

VENUE

The Hong Kong Management Association
Pico Tower
66 Gloucester Road
Wanchai
HONG KONG

CONTENTS

- Introduction to the fundamental knowledge of computer security
- Malware and Social Engineering Attacks
- Application and Networking-Based Attacks
- Wireless Security
- Host, Application and Data Security
- Basic concepts of Cryptography and Authentication
- Risk Mitigation & Vulnerability Assessment Development and Implementation of a Successful IT Security program
- Basic concepts of “information warfare” and “cyber-terrorism”
- How computer technologies have altered the ways in which embezzlement, money laundering, corporate espionage, fraud, and identity crimes are committed
- Future trends and issues in regards to digital crime and digital terrorism

METHODOLOGY

This workshop will consist of presentations, discussions and demonstrations. Practical exercises and examples will be used throughout the lesson to help demonstrate the risks posed by cyber security breaches. There will also be case studies based on real-life incidents. Participants will also learn the best practice in developing IT security policies.

WORKSHOP LEADERS

Dr Gordon Lee is the former Chief Knowledge Officer at IBM Canada and an adjunct professor at the University of Ontario Institute of Technology and Seneca College in Toronto. He is an experienced senior corporate manager with over 25 years of business strategy, technology, and people management roles in Fortune 500 companies. He has run multi-million dollar projects, intrapreneurial startups, customer consulting engagements and led internal disruptive transformations. Dr Lee has taught courses such as Business Strategy and IT Security (Cybercrime). His students have included working professionals in law enforcement, forensics investigators, IT management/staff, and university students entering the field. Dr Lee received his degree in Engineering from the University of Toronto and a MBA from the Rotman School of Management. He is also a Professional Engineer licensed by the Professional Engineers Ontario, Canada.

During his 20+ years of career in IBM, Dr. Lee has led numerous IT-related projects in the R&D Lab in Toronto, including IBM's first product in eCommerce. Gordon had global P&L responsibilities for the Lotus consulting business in Canada for 3 years, and also worked for the Lotus consulting services in IBM China.

Professor Wilfred Fong is the former Chief Information Officer at the University of Toronto (UofT) School of Continuing Studies where he helped develop the Certificate Program in IT Security. Before joining UofT, he is the Founding Faculty and Associate Dean of the Faculty of Business and Information Technology, University of Ontario Institute of Technology (UOIT), Canada, and he was one of the main developers of the Masters of IT Security program, the first of its kind in Canada, and the Director of IT Programs, overseeing the IT security, networking and computer gaming degree programs. Prior to his role at UOIT, Professor Fong is the Assistant Dean at the University of Wisconsin-Milwaukee School of Information Studies where he taught courses in IT-related programs, including IT security courses. He has conducted numerous seminars on IT-related topics, such as security, privacy and networking, in different countries to participants ranged from major financial institutions and government agencies as well as individuals who were seeking a career in the IT fields.

ENQUIRIES
